

## Continental's new stacked dryers for OPLs

The SuperStack90 has two 45-lb capacity pockets and STACK60 has two 30-lb pockets. Each model is said to deliver more basket capacity and productivity per square foot than other stacked tumblers. They have 20% more capacity and both units fit through a standard 34.5" door. Test data is said to show that the models require fewer BTUs per load.

For more information, visit [www.continentalgirbau.com](http://www.continentalgirbau.com) or call 1-800-256-1073.

## Digital conveyor controller cuts retrieval time

Unit by SRS Conveyors can be used with or without a computer and can be installed on almost any conveyor. It maximizes customer service by providing quick access to stored orders. Features are said to include: takes shortest path, stacks multiple requests, prioritizes the queue and can accommodate multiple tier conveyors. It also has forward/reverse manual control and secondary hand- or foot-control integration.

For more information, contact SRS Conveyors at 1-800-267-9355 or [sales@srsconveyors.com](mailto:sales@srsconveyors.com).

## Updated edition of Master Drycleaners Notebook

Everett Childers, consultant and lecturer, has updated his book of technical and practical information on fabrics, dry cleaning, spot removal and finishing. The new edition is available in English and Spanish through Childers. To contact him, email [elcchilders@yahoo.com](mailto:elcchilders@yahoo.com) or call 918-453-0495.

## Product news

### Spray-on water repellent

Pariser Industries' Par-Re-Pel is formulated to be used after finishing and is said to provide water repellency for a wide range of fabrics. In addition, it is said to be a highly effective oil stain repellent. The product is said to be non-toxic, non-flammable and not to clog fabric weave so the garment has breathability. Comes packaged in cases of four 1-gallon containers. For more details, contact Pariser Industries at 1-800-370-7627 or visit [www.pariserchem.com](http://www.pariserchem.com).

### Laundry cart saves space in truck

Tingue, Brown & Co.'s new Roundtripper® is 24" wide and will fit four-across in trucks between 96" and 101" wide. In addition, it is said to fit 52 carts on a 53' trailer. Converts quickly from shelves for clean linen to a bin for soiled work.

For more information, contact Ty Acton at [tacton@tingue.com](mailto:tacton@tingue.com) or call 1-800-829-3864.

### Enclosed cart with flush-mounted sliding doors

G.S. Manufacturing's newest cart was created for customers who need enclosed storage but do not have room to accom-

modate hinged doors. The doors give 34"x38" of clear space when open and have recessed handles on both sides for easy operation. The base plus two fixed shelves provide storage space, while the cart top is a convenient work surface. For more information, call 1-800-363-2278 or visit [www.gsm-cart.com](http://www.gsm-cart.com).

### Maytag's solution to poor venting

The new TurboVent™ technology is said to solve the problem of poor dryer venting in many group residences as well as coin laundries. The new technology features a blower that is said to spin 25% faster than previous Maytag commercial laundry models, without affecting the speed of the tumbler. This extra speed reduces drying time even in poor venting situations. For more information, contact your Maytag dealer.
