## INCREDIBLE BOOTHS A LOT OF WORK

David Netusil of Jensen gave us some insight into what it takes to bring a big booth to Clean. "I started the planning for the 2015 booth in November 2013. Since February 2014 it has been a full-time job, until we take it all down."

Jensen's booth linked many pieces of equipment into complete systems, included 70 people to install, demonstrate and sell the equipment, and the company hosted a fantastic party at the Georgia aquarium to thank its customers.

Not all booths were as elaborate, but all took effort, expense and planning. Thanks to all who participated in making Clean 2015 so successful.
